Tagaytay City, Cavite

ABOUT ME

Creative game lover specializing in generating ideas and passionately thinks about new game mechanics and interactivity.

EDUCATION

- STI College Tagaytay
- Tropical Innovative School of Excellence Inc.
- Tagaytay Christian Academy

TOOLS

- VS Code
- Visual Studio
- GitHub
- Unity
- Android Studio
- NetBeans

PORTFOLIO

RELEVANT COURSEWORK | KEY COMPETENCIES

- Game Development
- Computer Graphics
- Mobile Systems & Technologies
- Event-Driven Programming
- Integrative Programming
- Computer Programming
- Application Development

FEATURED PROJECTS

- Card Matching Game - Applied OOP inheritance and array data structures.
- Student Registration Form - Integrated event-driven UI with MS SQL database.
- Calculator - Designed and featured event-driven input handling and arithmetic logic.
- Queueing System - Implemented event-driven UI listeners and queue data structures for real-time ticket serving.
- Inventory Form - Built a CRUD desktop application connected to a relational SQL database.
- Shape Avoiding Game - 2D arcade game with real-time collision detection, game loop logic, and dynamic scoring.

TECHNICAL CONCEPTS

- Object-Oriented Programming
- Event-Driven Architecture
- Data Structures and Algorithms
- Database Management
- API's
- Discrete Structures
- Systems Integration and Architectures

LANGUAGES

- Python
- Java
- React Native
- C#
- MS SQL
- SAP S/4 HANA
