Tagaytay City, Cavite

ABOUT ME

- Core Vision & Philosophy: Passionate game enthusiast and developer dedicated to creating accessible, family-oriented games that bridge generations. Committed to designing wholesome, intuitive gameplay loops that are effortlessly engaging for children and elderly players alike.
- Systems & Game Mathematics: Deeply interested in the underlying mathematical architecture of games, including combat formulas, status effect scaling, health/damage balancing, and numerical game-state management.
- Technical Engineering: Experienced in implementing event-driven logic, state machines, array data structures, and relational database systems across C#, Java, Android Studio, and Unity 2D.
- Design Mindset: Continually researching and analyzing diverse game genres to deconstruct mechanics, player onboarding, and intuitive UI/UX design.

EDUCATION

STI College Tagaytay

TISE

Tagaytay Christian Academy

RELEVANT COURSEWORK | KEY COMPETENCIES

Game Development

Computer Graphics

Event-Driven Programming

Computer Programming

Application Development

Mobile Systems & Technologies

TOOLS

- VS Code
- Visual Studio
- GitHub
- Unity
- Android Studio
- NetBeans

FEATURED PROJECTS

- Matching Game
- Student Registration Form
- Two-player card game
- Queueing System
- Inventory Form
- Shape Avoiding Game

TECHNICAL CONCEPTS

- Object-Oriented Programming
- Event-Driven Architecture
- Data Structures and Algorithms
- Database Management
- API's
- Discrete Structures
- Systems Integration and Architectures

PORTFOLIO

[About Me](#)

LANGUAGES

- Python
- Java
- React Native
- C#
- MS SQL
- SAP S/4 HANA
